HYDRAULICS & PNEUMATICS
1981 Editorial Index

Out-of-print copies are available in complete volumes as positive microfilm copies from University Microfilms, 300 N. Zeeb Rd., Ann Arbor, MI 48103.

Basic technology

	Month	Page
Accumulators reduce components and energy costs, J.F. Grimes	Aug	70
Air compressor capacity controls: a necessary evil, H.P. Van Ormer, Jr.	Apr	79
Applying deformable bodies to fluid power design, L.M. Rubrich	Mar	63
Basic pneumatics		
Chapter 1: early history of pneumatic devices, and the 17th and 18th Century scientists whose thinking laid the groundwork for modern industrial pneumatics, W.C. Petty	Jan	102
Chapter 2: the composition of air, W.C. Petty	Feb	50
Chapter 4: the compressor cycle	Apr	86
Chapter 5: types of compressors	May	88
Chapter 6: compressor selection	Jun	80
Chapter 7: air preparation, R.P. Kilburn	Jul	84
Chapter 8: compressed air dryers, W.C. Petty	Aug	72
Chapter 9: distribution systems, J.E. Lovegreen	Sep	87
Chapter 10: cylinders	Dec	55
Changeover to HWBF: a case history	Feb	14
Compressor accessories conserve energy	May	24
Fluid power in coal mining: designs you can use, E. Jacobs	Nov	57
Fluid power systems & circuits, R.W. Henke		
Chapter 1: energy transfer systems	Jan	289
Chapter 2: classification of circuits	Feb	44
Chapter 3: criteria for designing open-loop circuits	Apr	92
Chapter 4: load analysis resistive	May	82
Chapter 5: analyzing overrunning and inertial loads	Sep	78
Chapter 6: constant flow circuits	Oct	167
Chapter 7: demand flow circuits	Nov	70
Glossary of programmable controller terms	Jun	16
HST tests electric cable, R.H. Park	May	80
Help yourself avoid hydraulic oil problems, J.M. Allen	Jul	82
High water base hydraulic fluids: a Ford better idea	Oct	228
How Ford Motor Co. tests high water base fluids, R. J. Adams	May	76
How to increase productivity through fluid power system design	Apr	61
Hydraulic horsepower comes out of its corner, H.J. Sculthorpe	Mar	HP-18
Hydraulic system maintenance program keeps giant wind tunnel blowing	June	20
Hydraulic wedge precisely adjusts press shut height, L.F. Wilson	Sep	73
Hydromechanical transmission saves fuel, N. H. Beachley	Jun	73
Hydrostatic drives: a progress report, T. Goldoftas	Aug	59
Microbiology of HWB hydraulic fluids, L.A. Rossmoore	Sep	86
Power converters for profit-making designs, A Staff Report	Mar	HP-1
Retrofit with hydraulic drive saves space and energy	Jun	12
Selecting electrical and electronic controls: a primer for hydraulic circuit designers, S.A. Burleigh	Sep	69
Solenoid valves and logic controls expand transmissions versatility, R.W. Harris and W.R. Jones	Dec	53
A technological advance: 8000-psi aircraft hydraulic systems, J.N. DeMarchi and R.K. Haning	Dec	43
Three steps for calculating pressure drop, E.A. Ulvilla	Oct	173
Understanding aerosol coalescing compressed air filters, D. R. Foltz	Dec	48
The void of vacuum, R.A. Moffatt	Mar	109
What's available in joy stick controls, R.T. Schneider	Apr	83
What lube systems can do for you, R. Stenglein	Nov	64

Books, education, and training

	Month	Page
Basic pneumatics		
Chapter 1: early history of pneumatic devices, and the 17th and 18th Century scientists whose thinking laid the groundwork for modern industrial pneumatics, W.C. Petty	Jan	102
Chapter 2: the composition of air, W.C. Petty	Feb	50
Chapter 4: the compressor cycle	Apr	86
Chapter 5: types of compressors	May	88
Chapter 6: compressor selection	Jun	80
Chapter 7: air preparation, R.P. Kilburn	Jul	84
Chapter 8: compressed air dryers, W.C. Petty	Aug	72
Chapter 9: distribution systems, J.E. Lovegreen	Sep	87
Chapter 10: Cylinders	Dec	55
Fluid power systems & circuits, R.W. Henke		
Chapter 1: energy transfer systems	Jan	289
Chapter 2: classification of circuits	Feb	44
Chapter 3: criteria for designing open-loop circuits	Apr	92
Chapter 4: load analysis resistive	May	82
Chapter 5: analyzing overrunning and inertial loads	Sep	78
Chapter 6: constant flow circuits	Oct	167
Chapter 7: demand flow circuits	Nov	70
Overcoming the productivity gap, A.O. Roberts	Jan	305
The recession of 1980-81, M. Greenfield	Jan	99

Circuit design

	Month	Page
Air/oil cylinder is heart of pneumatic truck suspension system	Oct	14
Applying deformable bodies to fluid power design, L.M. Rubrich	Mar	63
Circuit design: selector valve controls two-speed drive	Jan	28
Fluid power systems & circuits, R.W. Henke		
Chapter 1: energy transfer systems	Jan	289
Chapter 2: classification of circuits	Feb	44
Chapter 3: criteria for designing open-loop circuits	Apr	92
Chapter 4: load analysis resistive	May	82
Chapter 5: analyzing overrunning and inertial loads	Sep	78
Chapter 6: constant flow circuits	Oct	167
Chapter 7: demand flow circuits	Nov	70
Hi-lo hydraulic system works in both directions	Jul	14
How to increase productivity through fluid power system design	Apr	61
Hydraulic combine heads the for hills, N.G. Stroup and E.J. Krukow	Oct	153
Hydraulic front-wheel drive is there when grader operator wants it	Aug	14
Hydraulic horsepower comes out of its corner, H.J. Sculthorpe	Mar	HP-18
Hydraulic pressures shock earthmover, A. Akers	Oct	146
Hydraulic servomechanisms in flight simulation, G.M. McKinnon	Oct	148
Hydraulically powered twin-cylinder pump moves concrete	Sep	14
Hydraulics hits the slopes at ski resort, L.M. Okreglak	Feb	41
Hydro-pneumatic design provides unusual versatility, D.E. Clarke	Sep	76
Power converters for profit-making designs, A Staff Report	Mar	HP-1
Selecting electrical and electronic controls: a primer for hydraulic circuit designers, S.A. Burleigh	Sep	69
Submersible's intensifier-pump operates ballast system, D.E. Laxo	Sep	129

HST tests electric cable, R. H. Park	May	80

What size **metric** O-Rings do you need?

We stock the popular sizes for you.
We're America's leading O-Ring distributor and the only major distributor in the nation now stocking O-Rings in both Metric and American Standard sizes.

Our Metric O-Rings are made of Standard Buna-N 70 Durometer material. We carry over 600 sizes of the most popular Metric O-Rings currently being used in the U.S.

These cross-sections are available: 1.5mm, 1.6mm, 2mm, 2.4mm, 2.5mm, 3mm, 3.5mm, 4mm, 5mm, 5.7mm and 8.4mm. ID will range from 3mm (about .12 in.) to 395mm (about 15.6 in.).

For more information, write to P. J. Hill, Manager-Seal Sales, Bearings, Inc., 3600 Euclid Avenue, Cleveland, Ohio 44115, and tell him your Metric O-Ring needs, listing cross-section and inside diameter. Price list upon request.

Bearings, Inc.
Headquarters, Cleveland, Ohio 44115, (216) 881-2828
Dixie Bearings, Inc.
Subsidiary, Atlanta, Georgia 30303, (404) 522-7620

HUNGER Hydraulics
World's Largest Producer of Special Hydraulic Cylinders
From 1 to 60 in. ∅, 100 feet long
Telescopic cyls • Accumulators
HUNGER Hydraulics

AMERICAN GUARANTEE
GERMAN TECHNOLOGY
GERMAN KNOW-HOW

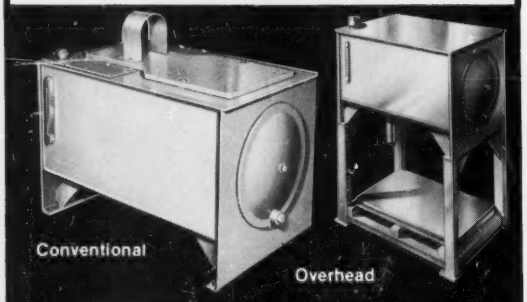
- Special Hydraulic Cylinders to your and our design
- Standard Tie-rod-Cylinders 500–3000 PSI
- Cylinder tubes of any sizes and material, honed and finished
- Piston rods – hard chrome plated
- Repair of Hydraulic Cylinders of all types
- All products in inch or metric dimensions
- Short deliveries

Circle **50**

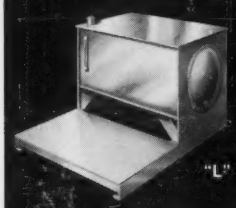
America's most complete line!

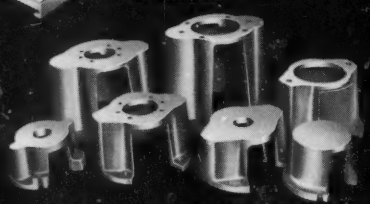
Hydraulic Reservoirs and Accessories

From 5 to 1,000 gallon capacities

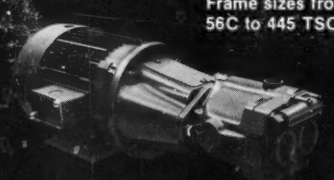


STANDARDIZED LINE OF HYDRAULIC RESERVOIRS

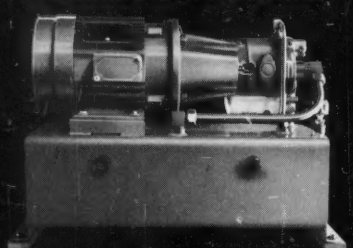




PUMP/MOTOR MOUNTS
Frame sizes from 56C to 445 TSC



"C" FACE MOTOR/PUMP COMBINATIONS
PVB Series, V10 Series, V20 Series



UNIVERSAL POWER UNITS
10 gal. reservoir capacity available with pressure-compensated pumps (Continental, Racine or Vickers).

Valves, directional control, quick guide to product selection	Jan	206

specify Green hydraulic cylinders

When you need fluid power components, you want top performance at a fair price. And prompt delivery.

For over 25 years, Green Manufacturing has been meeting these exacting specifications in mobile and agricultural equipment application.

We can meet your toughest standards, too . . . with dependable, custom-engineered hydraulic cylinders. Each carries a 12-month limited warranty and the Green assurance of quality.

Call or write for further information. You'll wonder why you never heard of us before.

GREEN MANUFACTURING INC.
P.O. BOX 408 419-353-5231
BOWLING GREEN, OHIO 43402

A756

A MATERIAL ADVANTAGE FOR O-RING USERS

Now Circle Rubber offers A-756, the new 70 durometer Nitrile material with these advantages:

- Wide range of applications
- A perfect substitute for many compounds
- Competitively priced
- Inspected to 1.5 A.Q.L.
- UL recognition

Write today for a laboratory report or contact your distributor.

HARD CHROME PLATING

DOING YOUR OWN PLATING SAVES $$$

PROFIT BY IN-PLANT PLATING
Significant annual savings • Ability to control quality • Rush jobs get top priority for delivery

OUR SERVICES INCLUDE:
Engineering of process • Plant lay-out • Providing equipment • Installing equipment • Operator training
